Series Title: Charted Embroidery Patterns of the Renaissance

This book and its images are copyright James G. Collins & Associates and Franciska Ruessink.
It is provided for non-commercial use only.

Dedicated to our husbands, children, and FR's mother; you know who you are.

If you believe that this publication has some value to you, please consider donating what you think is a reasonable sum to some worthy purpose; even a tiny amount may make a difference somewhere. Some donations may also be tax deductible.

I suggest the following organizations:

The *Antique Pattern Library* project is an excellent opportunity to support access to publications similar to this one. This service provides scans of craft pattern publications that are in the public domain. Many are edited for modern craftworkers and their technologies.
http://www.antiquepatternlibrary.org/index.htm

Good Shepard Services in New York City provides supports to vulnerable children and families. As an organization that grew out of the mission of a religious order, it seems an appropriate reflection of the various uses of needlework books during the Renaissance. https://goodshepherds.org/

Donations to your local library or a community college scholarship fund are valuable local investments.

Consider also Archive.org as it helps makes the CEPR resources available.

I would be surprised if any organization returns even a nominal donation. -HH-

About this book

Design Elements of Renaissance Embroidery is composed of patterns selected from the works of ten of the several early European print book producers. These enterprising individuals took up the new technology of the printing press and created these resources for an appreciative audience. In the 21st century there still exists about 150 different titles that were created during 1500s through the 1600s although there may be multiple editions of any of these (Lotz, 1963).

This book is composed of selections from several regions and by different artists. No one book is reproduced in full. This work is meant to show a variety of creative activity across Europe, using needle and thread, as told by one medium, the book. Take creative inspiration from this modern rendition of these works. An included bibliography indicates where some of these books are online.

Pattern books were used from the Italian states to England during the Renaissance. The books brought unique and elegant ideas from distant regions to new audiences. The patterns were not followed precisely but, rather, to provide inspiration to the people who obtained them. Across Europe there were regional differences in the availability of threads and thread dyes. Different fibers and fabrics were found in various regions and during various periods. Fashion styles also changed over time and place. The patterns were often modified to fit the resources and sensibilities of new sites and adjustments were expected.

The modern ideas of plagiarism and copyright did not exist hundreds of years ago, and people freely used and took credit for the work made by others. The artists and printers often obtained books produced by their colleagues. Sometimes they obtained the plates that had been used to print someone else's books. The ideas were incorporated by many of these manufacturers. It can be interesting to look through a selection of pattern books and take note of when and when the designs first appeared and how any particular pattern shown up again. It is also interesting to see what kinds of designs were popular in a specific region and time.

Designers, printers, or publishers.

Claude Nourry was printer in Lyon active from 1499 through 1533. When he died, Pierre de Sainte Lucie married his widow and continued the business until 1556. Antoine Belin designed some of the patterns for Sainte Lucie. Dominique da Sera, originally called Domenico da Celle, was a designer born in France who worked in the mid-1500s, predominately in Italy. He traveled extensively, and also worked in the Germany states and Spain. Matheo Pagano, a Venetian artist and printer active from 1538 through 1563, may have been contracted to print some of da Sera's patterns but also created new books. After Pagano, Giovanni Ostaus, a printer active from 1554 through 1592, also produced some pattern books.

Many artists and printers worked in Italy in addition to Pagano and da Sera. Alessandro Paganino was active from 1511 through 1538 in Toscolano and Venice. About the same time, from 1503 through 1544, Niccolo Zoppino also published books in Venice. So popular were these books for needlecrafts, the Italian designer, Federico di Vinciolo, is believed to have been asked to come to Paris in 1587 when someone married into the court of Henry the III. Vinciolo continued in Paris until his death in 1599. France and Italy were not the only places these works were created. Bernhard Jobin was active from 1566 to 1593 in Strasberg and Johann Siebmacher was a Nuremberg printer from 1590-1611. Both produced several editions of pattern books.

Modifying Patterns

Even when published, the patterns in these Renaissance books were not meant to be followed exactly but, rather, to provide ideas. Looking closely at specific patterns one can see that half designs are sometimes provided. For example, the charming Siebmacher dragon is bracketed on the left by half of a fountain and on the right, a potted plant. The ribbon below the dragon may be a frippery simply to fill the printed page and not related to the rest of the image.

Expand upon these designs; use graph paper to fill in the missing halves of the fountain and plant. The center of either of these two figures may need to be wider or thinner - draw alternate forms.

These are now your designs. You do not have to copy them with precision. Think about mixing parts of one figure with another. How would it look if the fountain had the planter bottom? When I drew this out, I discovered I needed to lower the oval and length the rise to keep the original height.

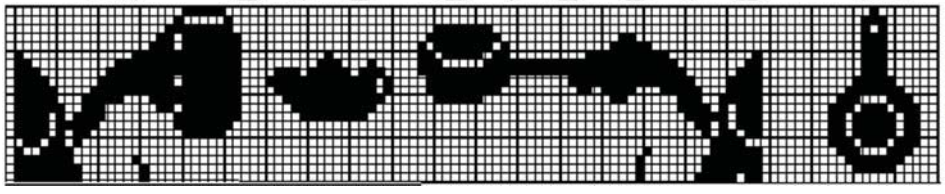
I really liked these modifications but they also reminded me of an old fashioned kitchen sink and stove. I then replaced some leaves with plates and cups on the fountain and a couple of pots on the stove to add to this impression

Being easily amused, I found this adorable but thought the dragon might want to use the kitchen. Since I did not want the dragon toiling over the sink or the stove, I moved an arm so it could hold a mug.

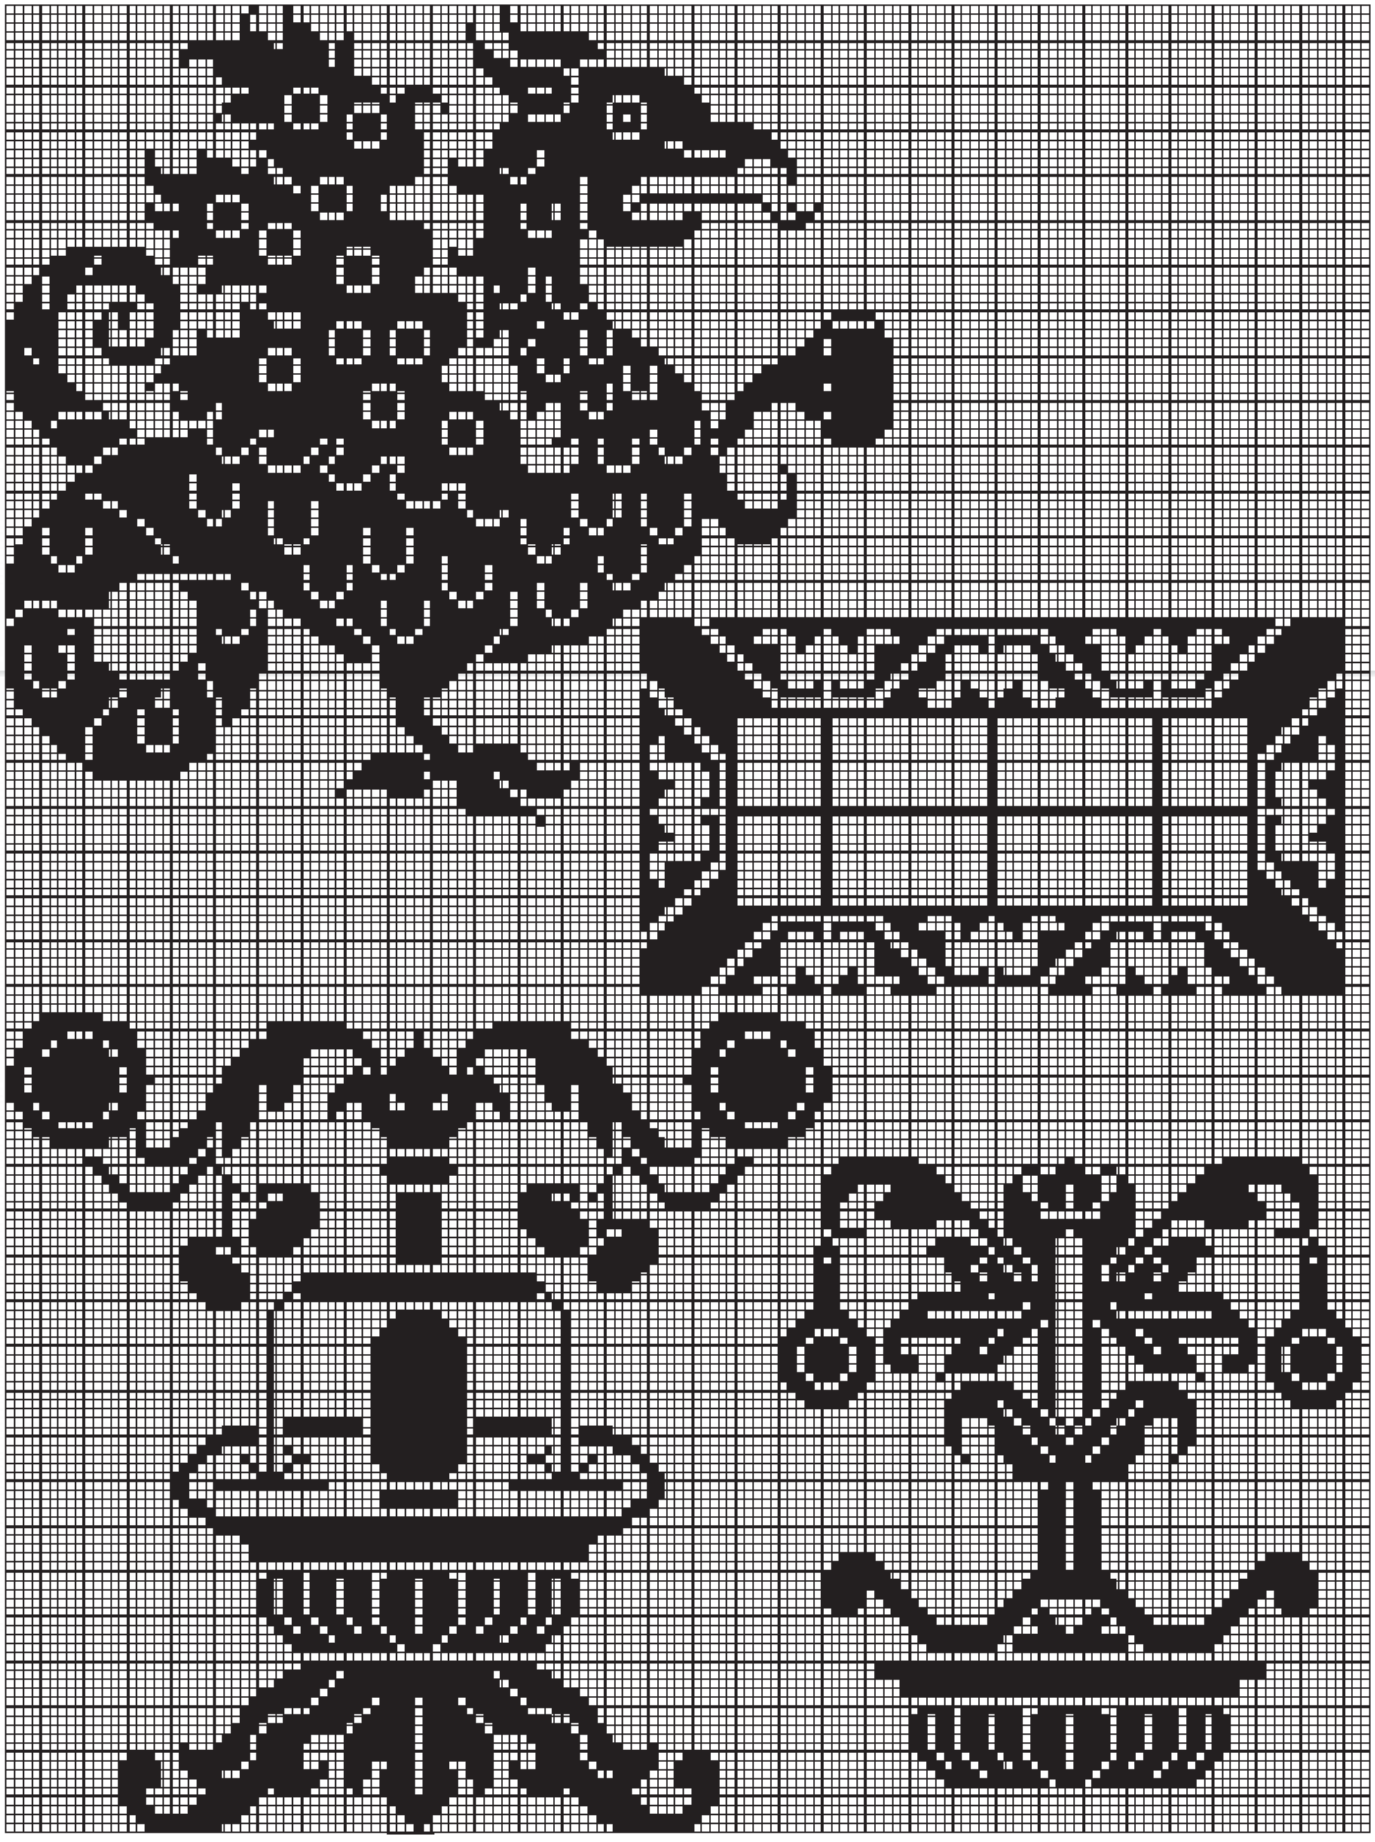
Friends thought this a great pub dragon especially if the fountain spouts a tasty brew.

A kitchen vignette might be a better gift for other friends. Toiling in the kitchen can be fun if one has company and a place to sit. A second dragon reversed creates a delightful couple. An additional fountain with the top removed becomes the table.

Fiddle with the ribbon by turning it into a rectangle and there is a window over the table.



Turn the mug into a cooking pan and we have two friends making and sharing hot cocoa.



Speckulate

Creating Patterns

Grab a pencil and “speck”ulate”.

Why would tiny bits of other patterns be useful in a book like this?

These specks are building elements much like a quilter’s building blocks. These building blocks, just “scraps” of fabric that, when fitted together, become pretty patterns, towers, castles, or whatever the creator decides. These building blocks can be taken apart and put together to create a world of different designs and objects, limited only by a person’s imagination. Rotate, reverse, stagger, experiment!!!

In our case, a pencil and piece of graph paper, with the inspiration of one or more of these specks, become wonderful fills, braids, and other beautiful works. Since the tiny pattern can be viewed by itself, the designer is freed from influence of the larger design and better able to generate something unique.

Example of designs from an 8 x 8 speck are:
